

AI Influencer Production Workflow

From Character to Consistent Instagram Content

AI Virtual Influencer Starter Kit

AI Influencer Production Workflow

From Character to Consistent Instagram Content

This document is the master production system for the starter kit. It connects character setup, content ideas, calendars, image generation, Canva polish, Instagram publishing, and weekly review into one repeatable loop.

Primary platform: Instagram (feed, Reels, Stories)

Secondary: X and TikTok / YouTube Shorts (repurpose only after the Instagram loop works)

What you will run:

- A one-time setup phase
- A weekly batch production phase
- A light daily publish + engage phase
- A weekly / monthly performance review

Treat your AI influencer like a media brand. Consistency beats volume.

1 — Workflow Map

Folder roles

Folder	Role
01-Workbook	Concept, niche, character, pillars, monetization worksheets
00-Character	Visual pack, captions for training / reference consistency
02-Prompts	Image prompts + caption / hook / X templates
03-Content-Ideas	Idea bank, formulas, custom idea worksheet
04-Calendar	Launch plan, 30-day grid, weekly batch planner
05-Canva	Sizes, design system, layout briefs
09-Ops	Operator SOPs, publish QA, repurpose matrix

2 — Tool Stack (Defaults)

You can swap tools. Keep **one tool per step** so the system stays simple.

Step	Default tool type	Examples
Text / planning	Chat LLM	ChatGPT, Claude, Gemini
Image generation	Image AI	Midjourney, Flux, Leonardo, DALL·E, etc.
Design / resize	Canva	Free or Pro
Primary publish	Instagram app or scheduler	Meta Business Suite, Later, etc.
Optional LoRA pack	Local script	00-Character/character/prepare_pack.py

Base character prompt (reuse every time)

A realistic AI influencer named [Name], [Age] years old, from [Country], with [hair], [eyes], [skin tone], [style], [personality], consistent facial identity, Instagram lifestyle photography, natural lighting.

Save this in a note titled **Base Prompt**. Paste it into every image generation session.

3 — Phase A: One-Time Setup (Day 1–2)

Complete these once before you batch content.

A1. Character bible

Use 01-Workbook worksheets:

- Influencer concept
- Niche selection
- Character profile
- Visual identity
- Content pillars
- Platform plan (Instagram primary)

Lock these fields: name, age range, face description, hair, eyes, skin, style, personality, brand colors (3–5), niche, caption voice.

A2. Visual references

1. Generate 10–20 test images with the base prompt.
2. Keep the best 3–5 as **face references**.
3. Optionally prepare a training pack with 00-Character/character/prepare_pack.py (see 09-Ops/prepare-pack-usage.md).

A3. Account skeleton (Instagram)

- ☐ Username available and on-brand
- ☐ Profile photo (clear face, consistent look)
- ☐ Bio with niche + personality in one line
- ☐ Link (Linktree, Beacons, site, or first offer)
- ☐ Highlights plan (About, Looks, Tips, Travel, etc.)

A4. Content system

- ☐ 3–5 content pillars chosen
- ☐ 20–30 ideas pulled from 03-Content - Ideas or written on the Idea Bank worksheet
- ☐ 7-day launch calendar filled (04-Calendar)
- ☐ Canva brand kit started (05-Canva)

4 — Phase B: Weekly Batch (2–4 hours)

Do this once per week. Do **not** create posts one-by-one every day if you can batch.

B1. Plan (30–45 min)

1. Open 04-Calendar/Weekly-Batch-Planner.md.
2. Pick 7–12 ideas from the idea bank (mix pillars).
3. Mark formats: feed photo · carousel · Reel · Story.
4. Apply **80% lifestyle / 20% soft promo**.

B2. Generate images (45–90 min)

1. Use prompts from 02-Prompts/100-AI-Influencer-Prompts.md.
2. Always prepend the base character prompt.
3. Generate in batches of 3–5 scenes.
4. Save winners only. Delete weak outputs immediately.

B3. Quality gate (15–20 min)

Before Canva or posting, check:

- ☐ Face matches references
- ☐ Hair / eyes / skin consistent
- ☐ Hands acceptable (or cropped)
- ☐ Lighting matches brand
- ☐ Outfit fits niche
- ☐ Background makes sense
- ☐ No random text, logos, or extra limbs
- ☐ Image sharp enough for mobile

Full checklist: 09-Ops/quality-gate.md.

B4. Canva polish (30–45 min)

1. Resize to Instagram specs (05-Canva/Instagram-Size-Specs.md).
2. Add overlays only when needed (quotes, tips, carousel numbers).
3. Keep safe margins; do not cover the face with text.
4. Export PNG or high-quality JPG.

B5. Captions (20–30 min)

1. Match character voice (warm, bold, educational, etc.).
2. Use 02-Prompts/Bonus-30-Instagram-Captions.md as starters.
3. One idea per caption. Soft CTA when promo.
4. Prepare 5–15 hashtags (niche + mid-size, not only mega tags).

B6. Stage for publish

- Folder structure suggestion: week-YYYY-MM-DD / 01-raw · 02-approved · 03-canva · 04-ready
- Name files: YYYY-MM-DD_pillar_format.ext

5 — Phase C: Daily Publish + Engage (15–25 min)

Publish (Instagram first)

1. Post from the ready folder.
2. Use 09-Ops/instagram-publish-checklist.md.
3. Alternate feed and Reels so the grid does not look random.
4. Cross-post a Story: still + sticker or poll.

Engagement window (10–15 min after post)

- Reply to early comments
- Like / reply to relevant niche accounts
- Save questions as future content ideas

Secondary channels (optional same day)

Only after Instagram is consistent:

- X: shorter text take or hook (Bonus-50-Viral-X-Post-Templates)
- TikTok / Shorts: repurpose Reels with a new hook (Bonus-30-YouTube-Hooks)

See 09-Ops/repurpose-matrix.md.

6 — Phase D: Review Loop

Weekly (Sunday or Monday)

Use 09-Ops/performance-review.md:

- Top 3 posts (reach, saves, follows, comments)
- Best pillar this week
- Worst format to pause or improve
- 3 ideas for next week from comments / DMs

Monthly

- Refresh 10 ideas into the idea bank
- Update bio or highlights if niche sharpened
- Test one monetization move (affiliate, digital product, brand pitch list)

7 — Content Rules

80 / 20 mix

Type	Share	Purpose
Lifestyle / value	~80%	Trust, recognition, saves
Soft promo	~20%	Offers, affiliates, products, collabs

Content pillars (pick 3–5)

Examples (customize):

1. Daily life / aesthetic
2. Niche moments (travel, fashion, fitness, AI...)
3. Tips and recommendations
4. Behind the scenes / process
5. Soft product or affiliate

Consistency (non-negotiable)

Keep stable:

- Face shape and features
- Hair color and usual style
- Eye color and skin tone
- Age range
- Overall fashion vibe
- Caption voice
- Niche promise

Change freely:

- Locations
- Outfits within style
- Props and activities
- Formats (photo vs Reel)

8 — Instagram-First Rules

Formats

Format	Best for
Feed 4:5 photo	Grid identity, lifestyle
Carousel	Tips, outfit details, story beats
Reel 9:16	Discovery, trends, hooks
Story 9:16	Daily presence, polls, links

Cadence (beginner defaults)

See full guide: 04-Calendar/Instagram-Posting-Cadence.md.

- **Launch week:** 1 post/day (mix feed + Reel)
- **Steady state:** 4–7 feed/Reels per week + Stories most days
- Prefer consistency over daily burnout

Grid rhythm

Alternate light/dark or calm/busy so the profile looks intentional. Avoid three hard-promo posts in a row.

9 — Monetization Insertion Points

Do not wait for 100k followers. Insert soft monetization after 2–4 weeks of consistent posting.

Slot	Calendar use
Soft mention	1 post per week (product in scene, no hard sell)
Direct promo	1 post every 1–2 weeks
Story swipe / link	After value posts
Affiliate in bio	Always available, rarely shouted

Workbook Page 10 and the monetization worksheet define offers. The calendar marks promo days with a **P** flag.

10 — 60-Minute First Run

Use this if you want progress today.

Minutes	Action
0–10	Fill name, niche, 3 pillars (workbook concept page)
10–20	Write base character prompt
20–35	Generate 5 images; keep best 2
35–45	Pick 3 ideas from 03-Content - Ideas
45–55	Write 3 captions; resize 1 image in Canva
55–60	Draft bio + username list

Tomorrow: finish the 7-day launch calendar and post the first image.

11 — Quality Gate (Quick Card)

Print or pin this.

Visual

- ☐ Same face as references
- ☐ Hands OK or cropped
- ☐ Lighting on-brand
- ☐ Outfit + niche fit
- ☐ No glitches / weird text

Copy

- ☐ Sounds like the character
- ☐ One clear idea
- ☐ CTA matches post type (none / soft / promo)
- ☐ Hashtags relevant

Platform

- ☐ Correct aspect ratio
- ☐ Alt text written
- ☐ First comment ready (optional)
- ☐ Story cross-post planned

Full version: 09-Ops/quality-gate.md.

12 — Common Failure Modes

Problem	Fix
Face changes every post	Lock base prompt; use references; fewer style changes
Account feels random	Fewer pillars; stick to calendar
Burnout	Weekly batch; fewer daily decisions
No growth	More Reels; stronger hooks; niche clarity
No income	Add 20% soft promo; clear offer in bio
Over-designed Canva	Less text; let the photo lead

13 — Start Checklist

- ☐ Read this workflow once
- ☐ Complete workbook character + niche pages
- ☐ Save base prompt
- ☐ Build 20+ ideas (03-Content-Ideas)
- ☐ Fill 7-day calendar (04-Calendar)
- ☐ Generate first image batch
- ☐ Pass quality gate
- ☐ Polish in Canva (05-Canva)
- ☐ Publish first 3 Instagram posts
- ☐ Schedule weekly batch time
- ☐ Run first performance review after 7 days

Launch goal: publish before you feel ready. Improve with real feedback.
