Instagram Size Specs

Pixel Sizes for Feed, Reels, Stories, and Profile

Sizes change occasionally. If something looks cropped in-app, prefer **4:5 feed** and **9:16 vertical** as safe defaults.

Core Sizes

Use	Aspect	Pixels (W×H)	Notes
Feed portrait (recommended)	4:5	1080 × 1350	Best grid presence
Feed square	1:1	1080 × 1080	Classic; less vertical impact
Feed landscape	1.91:1	1080 × 566	Rare for influencers
Carousel slide	4:5	1080 × 1350	Keep all slides same size
Story	9:16	1080 × 1920	Safe zone: keep text inward
Reel / Reels cover	9:16	1080 × 1920	Cover = first impression
Profile photo	1:1	320 × 320 min (export 800+)	Clear face crop
Highlight cover	1:1	1080 × 1080 art, circular crop	Consistent icons

Safe Zones

Stories & Reels (9:16)

Keep critical text and face away from:

- Top ~250 px (username / audio)
- Bottom ~350 px (caption / buttons)
- Side edges ~50–80 px

Feed

- Avoid tiny details at extreme edges
- Faces slightly above center work well on mobile

Export Checklist

- ☐ Correct aspect for destination
- ☐ No important content under UI chrome
- ☐ File under platform limits (compressed if needed)
- ☐ Color looks good on phone (preview on mobile)
- ☐ Filename includes date + format

Quick Reference Card

Feed photo	→ 1080 × 1350 (4:5)
Carousel	→ 1080 × 1350 (all slides)
Story	→ 1080 × 1920 (9:16)
Reel cover	→ 1080 × 1920 (9:16)
Profile	→ square, sharp face
